Color Grey

Description

[Click Here to View Pedigree & EPD's](#)

G2L's Miss Ida May is the sale sweetheart, ready to hit the show road running, but this genetic gold mine brings more than that to the table!! This deep-sided female is long and extended out of her head and neck but ties herself together in a maternal package. Miss Ida May possesses all the qualities of a champion! She is sired by KF Mr. Polled Tomas 22 (PP), who, as you can already tell from the previous lots, is a big hit around G2L Cattle Company. This homozygous polled bull has been used extensively on their ranch as they think this bull will be the one to take them to the next level as he sires calves just like Ida May every day. The dam to this outstanding female is a J&D Farms branded female that G2L Cattle Company purchased back in 2018. She is sired by Sr. Humphrey, who is an own grandson of the register of renowned sire, +JDH Sir Jerome Manso 224/4. To make this package even more unique, you would think a female with this much quality must stand some competition on EPDs, and you are correct, as she ranks in the 1/2 of the breed for BW, CW, WW, YW, milk, and yield grade.

Take this female home and make a donor out of her, as we think she has all the potential in the world. She's POLLED!! Make sure to have Miss Ida marked as an all-time favorite on sale day, as this polled female can be genetically valued as one of the best in your herd!!
