Description

We got excited when we realized what this package consisted of, and we think you will too! It takes a lot of time and money to make embryos, put them in, and hope they will stick, but not with this offering. Hollow Oak Farms is selling a pregnant female recipient carrying a GEM inside! The sire to the calf is LMC LN Polled Pappo 136/6 (PP), a homozygous bull that has been used successfully worldwide, siring outstanding red & grey cattle. His offspring have been some of the most sought-after due to their success in the show ring and the marketplace. The dam to the offspring is PCC New Polled Right Way 624/02 (P), a smooth-polled female who is growthy and stylish. She is sired by Mr. V8 794/7, who has been one of the breed's most widely used polled sires over the past three years. Mr. V8 794/7 is sired by the Reserve International Champion, sire of an International Champion, Mr. V8 604/7 "Man of Steel," and multiple trait leader, +Mr. V8 191/7. We are super excited as the pedigree of this HEIFER calf will be stacked, but not to mention it will be POLLED!! Don't miss out on a female-sexed pregnancy from Hollow Oak Farms that is sure to hang banners for you!!

Special Notes – Selling 1 pregnant recipient 75 days bred.

Quantity: 1
