Description

Talk about an offering!! Hollow Oak Farms is offering three female sexed embryos from the AUSTRALIAN HOMOZYGOUS POLLED SIRE Nioka Pablo and out of the proven donor PCC New Polled Right Way 624/0. Nioka Pablo has gained numerous friends and followers since his semen was released in the United States. Pablo has been one of the most widely used polled red sires in the United States, and the reports of his first calves are very positive. It should be noted that Pablo is an outcross to many of the current red bloodlines making him even more useful. The dam to these embryos is PCC New Polled Right Way 624/0 (P), a smooth-polled female that is growthy and stylish. She is sired by Mr. V8 794/7, who has been one of the breed's most widely used polled sires over the past three years. Mr. V8 794/7 is sired by the Reserve International Champion, sire of an International Champion Mr. V8 604/7 "Man of Steel," and multiple trait leader, +Mr. V8 191/7. The dam to 794/7 is Miss V8 510/6, also the dam to +Mr. V8 279/7 and Miss V8 100/7 the dam of "Noble." Whether you focus on breeding polled Brahman cattle or not, this opportunity could be considered an investment. There is a

growing popularity for polled cattle, there are fewer red-polled brahmans than grey, and these genetics are a good combination of the new and proven. You can't go wrong with this purchase! It's going to be a POLLED calf, a HEIFER, and have a chance to be HOMOZYGOUS!! What's that worth?! Don't miss out!

Special Notes – Selling three female sexed embryos with a guarantee of one pregnancy. If no pregnancy is achieved with the first three embryos, one additional embryo will be given.

Quantity: 3
