---

Come back to the sale, ladies and gentlemen!! JTB Laura is a show prospect that every first-time showman needs. Laura is so gentle and comes with a phenomenal phenotype when you study her closely. She is long extended through her front one-third, tying in quite nicely behind her hump. When you study her structure from the ground up, Laura stands on a giant foot and bone. When you get her on the move, she is lights out one of the best moving show prospects in the lineup. Laura is sired by JTB Piedmont (P), who has sired some outstanding females for JT Brahman of Anderston, Texas. On the bottom side, the mother to Laura is also a young JT female, JT Lauren, who is excellent in her EPD traits such as marbling, milk, and birth weight. To top this offering off, Lara ranks in the top 3% of the breed for marbling, 10% for milk, 20% for birth weight, and 20% for CEM. Folks, look how gentle this female is. Take a second look at JTB Laura; you don't want to miss this one!
