---

Lee's Miss 148/0 Manso is a female that we purchased from Lee's Cattle Company. This red female was in our keeping pen, but from the lack of grass and hay in our area, we had to let go of this nice set of replacement females. Being that this female is so good, it was hard to decide to let her go because of how good she is, both phenotypically and genetically. 148/0 is sired by LMC LN Polled Prodigy 188/7 (P), a full brother to one of the best RED POLLED bulls in the breed, LMC LN Polled Pappo. 188/7 is sired by Polled Pathfinder (P) 24 and out of the register of renowned female, +Miss Triple C 5/4

(S). On the bottom side, the mother to 148/0 is Mr. V8 771/7, a son of the iconic 2012 International Grand Champion bull, +Mr. V8 380/6. To top this female off, 148/0 ranks in the top 20% of the breed for carcass weight, 20% for birth weight, 25% for milk, and 35% for marbling. Looking for a stand-out red female that will make your donor pen look good? Why not purchase Lee's Miss 148/0 Manso? We think she is ultra good, don't miss out!!
